

SONESSE 2® 28 WF | ZIGBEE LI-ION

FOR BIG BLIND

MAXIMUM DIMENSIONS - W300 X H300 cm

RECESSED MOTOR FOR ROLLER BLINDS

The Sonesse2® 28 WF Zigbee Li-Ion motor is silent and reliable, with an integrated rechargeable Li-Ion battery — no wiring required, making installation and use more practical for both installers and end users.

BENEFITS FOR PROFESSIONALS

Fast and simple installation: Configuration and reconfiguration via the TaHoma Pro app with step-by-step instructions to save time.

Maintenance: Remote diagnosis and assistance via Serv-e-go.

Comfort: Fluid and very silent movement; slim and customisable motor head for better blind integration and reduced light passage.

Convenience: Intuitive user experience; optimised charging with USB-C® and Somfy professional charging station.

BENEFITS FOR THE END USER

Comfort: Smart light and privacy management, silent operation, discreet design to minimise light passage.

TaHoma 3.0 compatibility: App control and scenes with real-time feedback, also remotely; scene activation with TaHoma Switch.

Intuitive remote control compatibility: Dedicated remote controls for each blind with quick recall of preferred position.

Convenience: Optimised charging via solar panel, magnetic connector, or USB-C® fast charging.
